DESIGNED FOR THE ART OF WINNING

The DYE C8 Jersey is our most technical jersey to date. It includes a new thumb slot with hand padding, so you can wear the cuff as a fingerless style glove or as a standard cuff. The all-new 3D contoured padding on the shoulders conforms to the body, providing better protection and a more comfortable fit. The C8 jersey also features a mesh integrated v-neck collar, increased multi-mesh venting, and of course, patented DyeTack™. The C8 pant is the ultimate collaboration between pro athletes, product developers and designers. Featuring a new harness-stabilizing back yoke, increased venting, new 3D contoured padding on the hips and back yoke, and heavy-duty ballistic nylon flex-panels with responsive air-foam padding now on the sides and knees. Most importantly, we reduced the weight of the pant by almost half a pound.

The C8 line is available in Gold, Red, Blue, Gray and Olive.
