

DM8

THE CHOICE OF CHAMPIONS

New for 2008, the DM8 has a host of features, updates, and refinements. We have utilized our resources of professional players, designers, and engineers to create the best marker yet in the DM series. The DM8 continues the tradition of being one of the lightest, smallest, fastest and certainly the most accurate of paintball markers in the world. To improve on an already reliable design, the DM8 has no eyeplates. This is made possible with the new internal patent-pending Eye Pipe anti-chop sensing system. This new design eliminates the need for eyeplates and allows us to reduce the width of the marker body, ultimately decreasing the weight by 1.5oz. The new micro LPR has been reduced in size and now provides more efficient shot consistency. In addition, we are introducing the all new Hyper3™ regulator. The Hyper3™ is now smaller, more consistent, and more precisely adjustable allowing you to set your pressure in finer increments. All of these innovations, coupled with new 3D body styling, standard features like the patent pending Ultralite frame and 2 piece Ultralite barrel, give perfection a new meaning.
