PRO

DESIGNED FOR THE ART OF WINNING™

The Pro 13 is recognized as one of the lightest goggle systems on the market. Lightweight gear is crucial to performance. The less your equipment weighs, the better you can perform and focus on the game. The Pro 13 is 20% lighter than the previous 13 system, giving you every possible edge. One of the Pro 13's greatest features is the Multi-Directional Venting. This unique patented design drastically reduces re-ventilated fogging and will throw your voice farther and clearer than any other vented mask on the field. The Pro 13 comes equipped with our enhanced High Definition Lens, providing optimal lens clarity in any weather situation. We've developed soft, flexible compression formed earpieces for the Pro 13. These earpieces are lighter and less obstructive, allowing you to hear more clearly and providing a soft surface to promote deflections from oncoming paintballs.
